PROFESSIONAL SUMMARY

Computer Science undergraduate at **VIT-AP University** with a **9.23/10 CGPA** and **180+ LeetCode problems solved**. Full-stack developer with hands-on experience building applications using **Java, Spring Boot, React, Python, and MySQL**, with additional experience in **AI/ML, Generative AI, optimization, and data-driven systems**. Focused on solving real-world problems through scalable software and intelligent applications.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite, TanStack Router
Backend: Spring Boot, Spring MVC, Spring Data JPA, REST APIs
AI / ML: Machine Learning Fundamentals, Generative AI, Forecasting, Optimization, Python ML Libraries
Databases: MySQL, SQLite **Tools:** Git, GitHub, Maven, Postman, VS Code, IntelliJ IDEA
Core: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

VIT-AP University — Amaravati, Andhra Pradesh
Bachelor of Technology — Computer Science and Engineering; ***CGPA: 9.23/10***

Prathibha Career Point — *Intermediate (Class XII);* ***96%***

Surya Deep EM School — *Class X;* ***95%***

PROJECTS

Sahaayak — Cooperative Gig Services Platform | *React, TypeScript, Java, Spring Boot, MySQL* | **GitHub**

- Built a multi-portal platform connecting **customers, skilled workers, and cooperative administrators** through a unified service ecosystem.
- Designed workflows for **skill verification, geo-based matching, availability, bookings, payments, and workforce management**.
- Developed a responsive React frontend with a Spring Boot REST architecture for scalable platform integration.

GridPilot — AI-Assisted Grid Flexibility & Decision Support | *React, TypeScript, Python, FastAPI, AI/ML, Optimization* | **GitHub**

- Developed an AI-assisted decision-support platform for analyzing **renewable-energy variability and grid flexibility** through data-driven simulations.
- Combined **forecasting, stress detection, constrained optimization, and scenario analysis** to evaluate operational conditions.
- Created an interactive human-in-the-loop workflow for exploring what-if scenarios across EVs, HVAC, pumping systems, and cold storage.

LapWise AI — Intelligent Laptop Recommendation Platform | *React, TypeScript, Spring Boot, Java, MySQL, Groq API* | **GitHub**

- Built a full-stack laptop recommendation platform combining **intelligent scoring with Generative AI** based on budget, usage, and user preferences.
- Implemented Spring Boot APIs with **Spring Security, JWT, JPA/Hibernate, and MySQL**, with a responsive Vite/React frontend.
- Added AI chat, laptop comparison, favorites, recommendation history, and scoring across **programming, gaming, AI, battery, and value**.

CERTIFICATIONS

- **HackerRank — Frontend Developer Certification**
- **Microsoft — AI/ML Fundamentals**

ACHIEVEMENTS

- **180+ LeetCode Problems Solved** — Consistent practice in Data Structures & Algorithms and problem solving. **DSA Journey**
- **Smart India Hackathon** — Developed Sahaayak, a cooperative gig-services platform for real-world service coordination.
- **Academic Performance** — CGPA **9.23/10** at VIT-AP University; 96% in Intermediate and 95% in Class X.
